4. Venue is proper in this district under 28 U.S.C. §§ 1391(c) and 1400(b). On information and belief, Defendant has transacted business in this district, and has committed acts of patent infringement in this district.

5. Defendant is subject to this Court's specific and general personal jurisdiction pursuant to due process and/or the Texas Long Arm Statute, due at least to its substantial business in this forum, including: (i) at least a portion of the infringements alleged herein; and (ii) regularly doing or soliciting business, engaging in other persistent courses of conduct, and/or deriving substantial revenue from goods and services provided to individuals in Texas and in this judicial district.

U.S. PATENT NO. 8,606,503

6. Plaintiff is the owner by assignment of United States Patent No. 8,606,503 (the "'503 Patent") entitled "Device, System and Method for Remotely Entering, Storing and Sharing Addresses for a Positional Information Device." The '503 Patent issued on December 10, 2013. A true and correct copy of the '503 Patent is attached as Exhibit A.

COUNT I
(INFRINGEMENT OF U.S. PATENT NO. 8,606,503)

9. Alohar has, pursuant to 35 U.S.C. § 271, infringed and continues to infringe, the '503 Patent in the State of Texas, in this judicial district, and/or elsewhere in the United States by, among other things, making, using, selling, offering to sell, and/or importing, without license, systems for remotely entering and sharing location information, such as PlaceUS App. PlaceUS App falls within the scope of at least claim 1 of the '503 Patent, as evidenced by

Alohar's product descriptions. For example, PlaceUS App provides a method of entering location information into a positional information device. *See* <http://www.placeusapp.com/features/>.

10. PlaceUS App receives a request from a first positional device for at least one address stored in a second positional device, determines the second positional device, retrieves at least one address of the second positional device, and transmits the one address to the first positional devices. For example, PlaceUS App allows the user to "see where you family was, where they are right now, and where they are heading." *Id.* Additionally, PlaceUS App allows users to "get a real time update on a family member's trip and you're able to know the route they're taking." *Id.*

11. As a result of Alohar's infringement of the '503 Patent, Plaintiff has suffered monetary damages in an amount not yet determined, and will continue to suffer damages in the future unless Alohar's infringing activities are enjoined by this Court.

12. Unless a permanent injunction is issued enjoining Alohar and its agents, servants, employees, attorneys, representatives, affiliates, and all others acting on their behalf from infringing the '503 Patent, Plaintiff will be irreparably harmed.
